Skills

- JavaScript | TypeScript | Node | Express | Nestjs | React | Nextjs | React Native | Vue | Nuxt | GraphQL | SQL | NoSQL | Git | Github Actions
- Jest | Docker | Linux
- Portuguese, English

Experience

Front-end Developer	**Codeminer42**	*Poços de Caldas, MG, Brazil, Remote*	**01/2025 - Present**

- Web development using the latest JavaScript technologies within React and Vue environments.

Front-end Developer	**Metaway**	*Bento Gonçalves, RS, Brazil, Remote*	**07/2024 - 01/2025**

- I worked with Vue.js, Nuxt, TypeScript, and TailwindCSS on an educational management system for the city of Bento Gonçalves, RS, Brazil. The system was designed to manage all educational processes across various schools.

Fullstack Developer	**Kukac**	*Belo Horizonte, MG, Brazil, Remote*	**02/2022 - 06/2024**

- **Clube de Permuta**: I worked on developing the front-end using React, TypeScript, and Styled Components, and contributed to the backend using Express. Clube de Permuta is a relationship platform that facilitates business transactions through bartering. It mediates transactions by providing credits to members for barter operations.
- *Playfast:* I worked on integrating the front-end and mobile applications with the backend and the payment gateway (lugu), using React, TypeScript, TailwindCSS, and React Native. The platform was developed for a tennis club. Administrators can manage tennis instructors and students, view classes through a custom calendar, and handle student payments. Students can schedule classes and manage their membership plans.
- **UP Abrasel**: I worked on developing the front-end using React, TypeScript, and Styled Components. UP Abrasel is a platform that identifies weaknesses and competitive advantages of businesses, providing relevant data to support decision-making processes for managers aiming for better results. The solution is suitable for establishments of all sizes.
- **Factual**: I contributed to the development of the API using Node.js and TypeScript. Factual is a system that analyzes documents using a pre-trained model powered by the OpenAI API.

Front-end Developer, Intern	**Trato Tecnologia**	*Belo Horizonte, MG, Brazil*	**09/2021 - 01/2022**

- **Vita Money:** I worked on the frontend of Vita Money using PHP, Livewire, jQuery, CSS, and Bootstrap. Vita Money is a platform for fast and secure money transfers, enabling users to create accounts, send funds instantly, and allowing beneficiaries to withdraw money at convenient locations across Guinea.

Education

Bachelor of Computer Engineering	**Universidade Presidente Antônio Carlos**	*Conselheiro Lafaiete, MG, Brazil*	**02/2019 - 12/2023**

Certifications

- **CS50 Introduction to Computer Science – Harvard University** | Credential
